SYSTEM

# computer for all seasons, for all reasons...all good

Come see the most economical way  
to go large-scale hybrid at

BOOTH N, FJCC

## EAI 7800 analog / hybrid computing system

Servoattenuators spend  $\pm 0.01\%$  of value in less than one second, or digitally-controlled attenuators set in 10 microseconds for high-speed operation.

Individual logic and analog patch panels, shielding provide reduced crosstalk and improved performance.

Fully-integrated display wing with all provisions for data reduction, display and printout.

Human-engineered operating console with functional, convenient operating features, and parallel logic display.

computer

brid

Several attenuators will be 0.01% of value in less than one second, digitally-controlled attenuators set in 10 microseconds for high-speed operation.

Individual logic and analog patch panels, switching boards, and control panels provide reduced complexity and improved performance.

fully-integrated display wing with all provisions for data reduction, display and printout.

Human-engineered operating console with functional, convenient operating features, and parallel logic display.
