Radio Shack TRS-80™ Model I
WORD PROCESSING

WORD PROCESSING

SCRIPSIT™ — Radio Shack's New Word Processing Program for TRS-80

With TRS-80 and SCRIPSIT, you type the letters and documents onto TRS-80's easy-to-read 12-inch video screen, rather than on paper. Your text is also stored in memory and can be saved on cassette tape or magnetic disks for later use or revision. If your TRS-80 contains our new lower case kit, SCRIPSIT will work with upper and lower case letters on your screen and printer.

The Word Processing Difference

Once you've typed your first draft, the real advantages begin. You easily can correct errors, insert and delete words, sentences or even paragraphs quickly on your video screen. You can move, exchange, rearrange, or copy specified "blocks" of text. You can print any number of error-free "originals" at 500 words per minute! SCRIPSIT lets you specify top, bottom, right and left margins, line spacing, paragraph spacing, automatic page numbers, headers, footers, indentation, hyphenation, vertical or horizontal centering, flush right or left text, justification (all lines the same length), or the usual "ragged right" personal letter look. These format instructions are stored with the text, so any or all can be changed, at will, inside one document. Use SCRIPSIT to build a file of form letters so you can load and address them as needed. SCRIPSIT can automatically find and change every "Mr. Goff" in your letter to "Miss Brownlee." Continuing reports can be loaded, updated, printed, and stored again for the next revision. And our carbon-ribbon WP-50 printer produces beautiful typewriter-quality letters.
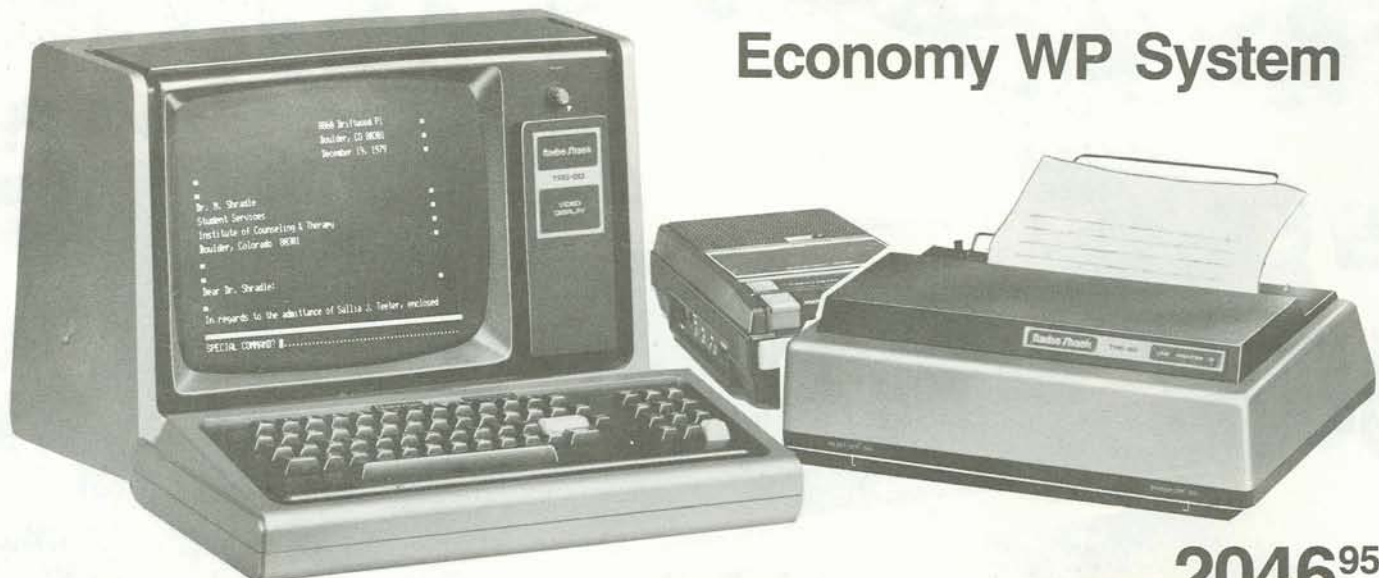

You'll Never Want to Use Another Typewriter

SCRIPSIT is a new dimension in typing ease, efficiency and convenience. It encourages finishing touches and last-minute improvements you don't usually make because of the time and effort to retype the document. Throw your correction fluid away and forget messy erasures. It is literally a typist's (and a boss's) dream come true. Finally TRS-80 and SCRIPSIT make it affordable.

Visit your nearest Radio Shack outlet for details on adding word processing to your present office or to your TRS-80 system.

Cassette SCRIPSIT (Requires 16K, Level II) **26-1505** **$69.95**
Disk SCRIPSIT (Requires 32K, Level II) **26-1563** **$99.95**

Economy WP System

2046⁹⁵

Here's our lowest cost TRS-80/ SCRIPSIT WP system. Everything you need, even an audio training course, that can teach anyone how to get maximum benefit from all of the SCRIPSIT features. Of course, as with all TRS-80 systems, you can expand to disk storage, more internal memory or even our new WP-50 Daisy-Wheel printer.

The economy system comes with our small, compact 100-character-per-second Line Printer II.

Characters are formed by a series of dots, rather than the more formal typewriter look of the WP-50. This system is ideal for internal reports, memos, informal correspondence or text editing.

System Consists of

26-1056	16K Level II TRS-80
26-1154	Line Printer II
26-1505	SCRIPSIT Software
26-1104	Lower Case Kit
26-1416	Line Printer II Interface Cable

Secretary WP System

4036⁹⁵

Our most economical system which includes the all new TRS-80 WP-50 Daisy Wheel Printer for that "electronic typewriter" look to your important correspondence. (The WP-50 features are discussed in detail on the last page of this brochure.) The Secretary system uses ordinary cassette tapes for storage of the SCRIPSIT program, and your documents. Of course it can be expanded or upgraded at any time.

System Consists of

26-1056	16K Level II TRS-80
26-1157	WP-50 Printer
26-1411	Printer Interface Cable
26-1505	SCRIPSIT Software
26-1104	Lower Case Kit

Ways that TRS-80 Word Processing Can Save You Time and Money!

Executive WP System

5492⁹⁵

Our top-of-the-line system for word processing! We've taken the Secretary WP System above and added the convenience of Mini-Disks. With Mini-Disks you can load or save programs and documents almost immediately— unlike the cassette system where some time is lost while waiting for cassettes to load.

Pit our Executive Word Processing System against the competition's $10,000 systems. You'll find that TRS-80 word processing outvalues them all. Discover SCRIPSIT and these powerful WP systems at a Radio Shack outlet near you.

System Consists of

26-1056	16K Level II TRS-80
26-1141	Expansion Interface
26-1160	Mini Disk Drive I
26-1161	Mini Disk Drive II
26-1401	Printer Cable
26-1157	WP-50 Printer
26-1104	Lower Case Kit
26-1563	SCRIPSIT Software

Radio Shack

A Division of Tandy Corporation

MEMO TO : TRS-80 Owners and Friends

FROM   : Radio Shack

SUBJECT : New TRS-80 Word Processing Hardware

       Radio Shack has introduced a new TRS-80 modification
kit and an exciting new printer to complement Scripsit's cap-
abilities. You can include them in your new system, or add ei-
ther or both to an existing TRS-80 Model I system.

       Although not required by Scripsit, the new Upper/Lower
Case Kit adds lower case letters to TRS-80's standard upper case
only video display (and printouts with an U/LC printer). The kit
is activated by a software switch in Scripsit, or by a Lower Case
Driver program furnished with the kit, so there are no visible
changes to your keyboard. A new character generator produces
true lower case "descenders". Some non-Radio Shack programs may
not function properly with the kit installed. Early versions of
Radio Shack's Level II Cassette Payroll and disk Accounts Rec-
eivable will require revised programs, available on order through
your local store at no charge. The Kit is available installed
only. Order catalog No. 26-1104.............$ 99.00

       The new TRS-80 WP-50 Daisy-Wheel printer is designed
specifically for Word Processing, and to produce the crisp, clean
look of the best electronic typewriters, but at almost twice the
speed of most. The type faces are changeable as in "ball" type-
writers, and of course a carbon-film ribbon is standard. This
memo has been prepared on Scripsit, using the WP-50. It attaches
to the Expansion Interface printer connector, or can be connected
directly to any Level II TRS-80 using a Printer Interface Cable.
26-1157 WP-50 Daisy Wheel Printer......................$ 2,960.00
26-1401 Printer Cable for Expansion Interface..........   39.00
26-1411 Printer Interface Cable........................   59.00

Please Note: Scripsit may not work with any non-Radio Shack
          lower case modifications.
