5 REASONS WHY THE DIABLO 3200 IS THE SOLUTION FOR PROBLEMS WITH BILLING, ASSET MANAGEMENT, AND FINANCIAL REPORTING.
The Diablo 3200 Small Business Computer

**ACCURACY**
The twelve inch video display shows all information to be processed and printed in large, easily read characters. Prompting messages and blinking cursor direct operator attention to specific screen areas which reduce document preparation errors.

**SPEED**
Flexible diskette drives allow immediate access to business records. No cards, tapes or cassettes are necessary. Up to four diskettes per system make one-half million to three million information characters readily available. Multiple records may be displayed in fractions of a second. The Diablo Hy Type II Printer provides high-speed, typewriter quality printed reports, invoices, business correspondence, charts and graphs. It can produce an invoice in five to ten seconds.

**MODULARITY/GROWTH**
A standard interface is available to allow the 3200 System to communicate with other computer systems. The Diablo 3200 is also compatible with IBM Binary Synchronous communication methods. Larger discs, hi-speed printers, and additional CRT units may be added for greater capability.

**SIMPLICITY OF OPERATION**
Specific business applications can be programmed quickly and economically. The Disk Operating System controls operator interaction with the computer so that required technical knowledge is minimal.
An English-like program language simplifies adaptation to specific needs. The CRT presents instant, clear video generated display. The typewriter style keyboard is an uncomplicated, clean design which reduces operator error and increases efficiency.

**LOW COST**

The Diablo 3200 is designed to increase productivity and profitability by streamlining day-to-day accounting and automatically updating management information. Existing office personnel can be quickly trained to operate the Diablo 3200. The video display guides the operator accurately and easily through billing, payroll preparation, financial reports and daily business records.
LAW FIRM MANAGEMENT

- Client Billing
- Accounts Receivable
- Time Analysis & Control
- Fee & Expense Variance Reports
- Accounts Receivable Age Analysis
- Client Statements
- Work-In-Progress Report
- Work Produced by Attorney
- Billing & Working Hours by Attorney
- Typewriter Quality Reports on 8½ x 11 Paper

- Payroll Checks with Statement of Earnings
- Earnings & Deductions Registers
- Wage Accrual
- Labor Distribution
- Employee Earning Record
- 941-A and W-2
- Union Report
DOCUMENT PREPARATION/ASSEMBLY

- Titles
- Wills
- Contracts
- Briefs
- Proposals
- Mailing Lists
- Correspondence
- Paragraph Library

Diablo 3200 Small Business Computer
SINGLE SYSTEM SOLUTIONS FOR DUAL WORD/DATA PROCESSING REQUIREMENTS

Any business, profession or governmental agency documents and accounts for its affairs with word processing and data processing systems. In the past, business equipment suppliers provided separate systems for each function — and charged for two machines.

At last technology has produced one computer for both word and data processing — at the cost of one machine.

Now one administrative computer system with video screens, large and small disk and diskette drives and high quality printers does it all.

The equipment is furnished by a Xerox company. It is distributed exclusively in the U.S. by Shasta General Systems with complete applications for:

DATA PROCESSING
Medical/Dental Practice Management
Accountants Client Reporting Systems
Financial Reporting Systems
Legal Practice Management Systems
Distribution/Manufacturing Systems
Government Agency Systems
Payroll/Labor Distribution Systems
Accounts Payable Systems

WORD PROCESSING
Correspondence
Proposals
Document Assemblies
Form Letter Preparation
List Maintenance
Direct Mail Campaigns
Legal Documents

WORD PROCESSING STANDARD FEATURES

- MONOSPACED OR PROPORTIONAL SPACING
  allows the operator to choose the print characteristics.

- RAGGED/FLUSH RIGHT MARGIN
  allows the operator to choose the type margin.

- VERTICAL SCROLLING
  provides the ability to move both forward and backward through a document a line at a time as it is displayed on the screen.

- HORIZONTAL SCROLLING
  provides the ability to display and modify documents wider than the 80 columns of the CRT screen.

- PAGE FORWARD/BACK
  allows the document to be moved forward to the next page or back to the previous page with one keystroke.

- PAGE/LINE SEARCH
  provides the ability to move instantly to a particular page or line of the document.

- STRING SEARCH
  provides the ability to search for the next occurrence of a particular string of characters.

- INSERT/DELETE TEXT
  allows the insertion or deletion of any amount of text at any point in a document followed by automatic realignment of margins and by automatic repagination.

- SUBSCRIPTS AND SUPERSCRIRPTS
  permits the entry of formulae into the text with the appropriate printing of the designated characters.

- AUTOMATIC CENTERING
  permits the operator to specify that a line is to be centered between the left and right margins.

- TRACE FEATURE
  permits the display of the in-text control characters thereby giving the operator full access to and modification of the stored document.

- LINE NUMBERS KEY
  permits the operator to display the line numbers of a document with one keystroke.

- MERGE FUNCTION
  permits two documents to be combined into one printed document.

- STRING SEARCH
  provides the ability to search for the next occurrence of a particular string of characters.

- INSERT/DELETE TEXT
  allows the insertion or deletion of any amount of text at any point in a document followed by automatic realignment of margins and by automatic repagination.

- PRINT
  while drafting or revising is in process for faster throughput.

- DOCUMENT ASSEMBLER
  allows often used paragraphs, words and/or lines to be included into a document from a library stored on the disk.
