specifications

Electronic Computer Division

UNDERWOOD CORPORATION

One Park Avenue - New York 16, N.Y.

INPUT

Standard 10 key Sundstrand Keyboard, enabling fast touch operation.

OUTPUT

20 digits per second of computed data, plus 14 digits of descriptive information.

Two output carriages used jointly or independently of each other, allowing for full flexible format on rolls, continuous forms and individual unit forms up to 24 inches wide.

CODE SYSTEM

Straight decimal numbers, internal and external, word length of 10 digits (plus sign).

PROGRAM

Interchangeable control tapes offer unlimited number of programs,

One control tape contains more than 2,400 instruction steps divisible among many programs, including conditional or unconditional transfers.

Each instruction step can control computing, printing and carriage functions.

COMPUTER DESIGN

Desk size computer with main input-output carriage alongside, forming an 'L'.

Magnetic memory drum with 50 registers turning at 1800 r.p.m.

SPFFD

Adds, subtracts, or multiplies a 10 digit number at the rate of 15 a second, including access time.
